

Practice Test: Trigonometry

1. What is $\sin(30 \text{ degrees})$?

Answer: 0.5

2. What is $\cos(60 \text{ degrees})$?

Answer: 0.5

3. What is $\tan(45 \text{ degrees})$?

Answer: 1

4. If $\sin(x) = 1$, what is x in degrees?

Answer: 90 degrees

5. If $\cos(x) = 0$, what is x in degrees?

Answer: 90 degrees

6. In a right triangle, opposite = 3, adjacent = 4. What is $\tan(\theta)$?

Answer: $\frac{3}{4}$

7. What is the value of $\sin^2(x) + \cos^2(x)$?

Answer: 1

8. Convert 180 degrees to radians.

Answer: π radians

9. What is the secant of 60 degrees?

Answer: 2

10. What is the cosecant of 30 degrees?

Answer: 2
